Announcements

The 8th Yao Yuan Biotech-Pharma Symposium April 23, 2016 - Emerging Therapeutics: A Fundamental Driver of Pharma's Future Growth; University of Illinois at Chicago, College of Pharmacy Auditorium

Despite the high cost and low probability of success associated with drug discovery and development, we are at a time that new drugs with improved profiles and new mechanisms of action are still emerging. As a result of better understanding fundamental biology, rigorous academic and industrial research, and fruitful collaborations, scientists are discovering break-through therapies for hard-to-treat diseases and greatly benefitting patients. In this forum, case studies on early discovery research and clinical development of compounds that are on or at the brink of being brought to the market will be presented. Progress in the exciting field of oncology (e.g., CAR-T cells, IDO and BCL-2 inhibitors), which is at the tipping point of producing revolutionary therapies, will also be discussed.

Time: April 23, 2016

Venue: University of Illinois at Chicago, College of Pharmacy Auditorium

Address: 833 S Wood St, Chicago, IL 60612

Confirmed Speakers:

Dr. Samuel Blackman, Senior Medical Director, Juno Therapeutics

Dr. Andrew P. Combs, Vice President, Incyte Corporation

Dr. Michael E. Jung, Distinguished Professor, UCLA

Dr. Dennis C. Liotta, Samuel Candler Dobbs Professor, and Executive Director Emory Institute for Drug Development, Emory University

Dr. Andrew Souers, Senior Research Fellow & Project Director, AbbVie, Inc.

Student Poster Award and Presentations

Panel Discussion: What Skills and Experience Are Pharma Looking For?

Sponsor's Exhibitions

Chaired by:

Dr. Xueqing Wang, Sr. Group Leader, Discovery Chemistry and Technology, AbbVie, Inc.

Dr. Hyunwoo Lee, Assistant Professor, Department of Biopharmaceutical Sciences, University of Illinois at Chicago

Dr. Alexander Mankin, Professor and Director, Center for Pharmaceutical Biotechnology, University of Illinois at Chicago

Calling all Chemists interested in Law, Business, and Technology!

The one-year [Master of Science in Law \(MSL\)](#) program at Northwestern Pritzker School of Law prepares students for careers at the intersection of law, business, and technology. Designed especially for students with engineering, science, technology, mathematics, and medical backgrounds, the MSL provides practical, focused, business-centered legal training that enables students to communicate across disciplines; develop, protect, and manage intellectual property; bring ideas to market; and navigate the legal and regulatory structures that exist in STEM settings. MSL graduates are well positioned for careers as: patent agents; IP/patent portfolio managers; scientific and/or technical consultants; business developers; regulatory strategists; compliance officers; patent coordinators; entrepreneurs; and more. Scholarships are available.

Learn more by joining us for our upcoming webinar. We will provide a comprehensive overview of the MSL program, including curriculum, full-time and part-time scheduling, career opportunities, and more. We will also take questions from the audience.

- April 7 at 4pm
- Join online: <https://northwesternuniversity.adobeconnect.com/mslwebinar>

Anyone interested in the Master of Science in Law program is welcome to contact Susan Dennehy, Administrative Director, at susan.dennehy@law.northwestern.edu.

LabVIEW Boot Camp at Northwestern

If you are new to LabVIEW or looking to improve your skills, this free hands-on course introduces you to graphical programming with LabVIEW system design software. Learn how to develop data acquisition, instrument control, data logging, and measurement analysis applications. Benefit from an opportunity to take the Certified LabVIEW Associate Developer (CLAD) exam, a globally recognized entry-level certification exam, for free.

Cost: Free (a \$3,200 USD value)

You will:

- Learn the essentials you need to successfully build an application requiring measurement or control
- Explore the LabVIEW environment, dataflow programming, and common LabVIEW techniques to jump-start application development or improve your existing applications
- Create applications using the state machine design pattern to acquire, process, display, and store real-world data
- Gain an overview of key concepts and preparation materials for the CLAD exam

Registration information:

Northwestern University

Technological Institute

IMSERC Computer Lab, Room B190

March 21 - March 24

9:00 a.m.–5:00 p.m.

Must attend all days to take the exam

Registration

Opportunities

The Barnes Integrated Materials Research Group with Washington University in St. Louis is seeking a talented and highly motivated candidate to fill an open post-doctoral position this Fall (2016) in the Department of Chemistry at Washington University (Wash U) in St. Louis. The preferred candidate should possess extensive experience in synthetic organic chemistry, and have interests in supramolecular chemistry, polymer/nanoparticle synthesis and characterization, as well as (spectro)electrochemistry. Additionally, this position will allow for potential opportunities to carry out *in vitro* (both mammalian and bacterial cells) and *in vivo* efficacy studies related to some of the multi-functional materials prepared in our synthesis laboratory.

The Barnes Research Group is a newly established research laboratory at Wash U, beginning in July of 2016, and will specialize in the design and development of ‘smart’ functional materials, which capitalize on non-covalent bonding interactions and various polymerization methodologies. Researchers who join our laboratory will gain valuable experience in a broad range of areas and techniques, such as synthetic chemistry, polymer synthesis, characterization of non-covalent bonding interactions and host-guest systems, absorption spectroscopy, electrochemistry, size-exclusion chromatography, dynamic light scattering, cell culturing, and *in vivo* efficacy studies. The new Barnes research space will consist of a large synthesis laboratory (multiple fume hoods, double glovebox, solvent purification system, etc.), in addition to a biological laboratory (complete with a cell culture room) and an instrument room for electrochemistry and optical absorption spectroscopy experiments.

Applicants should have successfully completed their PhD requirements by the time of appointment at Wash U and have excellent laboratory and analytical skills, as well as strong abilities in oral and written communication. Full applications include a curriculum vitae, a brief summary of past and current research accomplishments, selected reprints of publications, three letters of recommendation, and designation of a preferred start date. These materials should be emailed as PDF’s directly to Professor Jonathan Barnes (jbarnes@wustl.edu). Select applicants will be contacted and interviewed in late March and early April, and expected to begin post-doctoral work in the Fall of 2016.

The H.T. Soh Laboratory at the ChEM-H Institute at Stanford University develops novel materials and biosensors for the early detection and personalized treatment of diseases (<http://sohlab.stanford.edu/>).

We invite applications for postdoctoral research fellows in the area of bioinformatics and nucleic acid chemistry & technology.

Position Requirements:

Applicants should possess a Ph.D. in chemistry, biochemistry, bioinformatics, or a related field. The ideal candidate will have a record of scientific rigor, productivity, and creativity; the ability to work both independently and as part of a team; and a strong publication record. Excellent oral and written communication skills are required.

Interested applicants should provide a cover letter, CV, and three letters of reference. This information must be sent via email (sohlab@ee.stanford.edu). Salary and duration of the position will be commensurate with experience.

Professor Oren Scherman (University of Cambridge) is looking for an extremely motivated and talented individual for the position of group manager and scientific coordinator. The Scherman Group Manager will be an integral member of Professor Scherman's group based in the Melville Laboratory within the Department of Chemistry at the University of Cambridge, acting as coordinator and administrator for his large interdisciplinary research team. The role holder will manage the running of a large research team (which comprises of 25-30 post-doctoral researchers, graduate students, and visitors) and co-ordinate its extensive research activities across a number of centres within the University. The role holder will develop and provide support mechanisms which enable and promote collaboration with external organisations (to arrange facilities not available within the group and foster relationships with external research partners) and have oversight of medium to long term research operation strategy. In addition, the role holder will provide research, personnel and financial advice to the PI (including the development of appraisal and performance management). The role holder has responsibility for the effective management of the appropriate financial resources and be responsible for medium term financial planning.

Duties will include contributing directly to the teaching and research activities of the group in the area of experimental chemistry. In addition the role holder will assist with the writing of publications and reports for funding bodies. Contribution to teaching will include assistance in the presentation of seminars and may include participation in the research group's teaching and outreach programme. The successful candidate will be educated to PhD level in Chemistry or a field related to the research activities in the group and have breadth of experience in research coordination / group administrative. Having well-developed communicational skills and the ability to relate well to a wide range of people is essential. Additionally, having a high degree of literacy with experience of independently writing clear and concise documents and the ability to make independent decisions and take effective action is highly desirable.

Fixed-term: The funds for this post are available for 3 years in the first instance.

Once an offer of employment has been accepted, the successful candidate will be required to undergo a health assessment.

To apply online for this vacancy, please go to the following website:

<http://www.jobs.cam.ac.uk/job/9362/>

and click on the 'Apply' button at the bottom of the page. This will route you to the University of Cambridge Web Recruitment System, where you will need to register an account (if you have not already) and log in before completing the online application form.

For informal queries please contact Emma Graham ejg49@cam.ac.uk, 01223 763188.

Please quote reference MA08210 on your application and in any correspondence about this vacancy. Further information can also be found on the website.

The University of Liverpool is seeking to recruit to up to 10 academic positions in the Faculty of Science and Engineering in the broad area of materials research, distributed across the School of Physical Sciences (Chemistry, Physics & Mathematics), School of Engineering, the School of Electrical, Electronic Engineering and Computer Science, and the School of Environmental Sciences across the areas of Chemistry, Physics, Materials Science, Engineering, Computer Science. You should have an outstanding research track record, as demonstrated by publications and other relevant outputs.

Applications will be considered from any area of materials research, but would be particularly welcomed

in the areas of computational materials chemistry, polymer physics, rheology, robotics and/or automated metrology, biomaterials, materials processing and related areas. The posts will be aligned with the Materials Innovation Factory (MIF), a major new £68m research institute that is being established at the University. For the Chair or Readership positions you will be expected to demonstrate a significant track record of funding and a capacity for leadership in your field.

The University is an Athena SWAN Bronze Award holder and is committed to encouraging, developing and supporting women in their research and academic careers. We are working to create an inclusive environment which values a diverse workforce and we recognise that many individuals value flexibility in their work/life balance, therefore these posts may be taken up on a part-time (a minimum of 0.5fte) or full-time basis (including a job share).

The Department of Chemistry at Smith College has initiated a search for a non-tenure-track, full-time visiting Assistant Professor of Chemistry position to begin July 2016. This position is an initial one-year appointment with an additional re-appointment possible, conditional on performance and the needs of the College. Depending on the candidate's field of specialization, primary teaching responsibilities will include a total of five courses per year in areas suited to the candidate's expertise. The department offers courses in General, Organic, Inorganic and Physical chemistry, as well as Biochemistry and Environmental Chemistry. All members of the Chemistry Department participate in teaching and we seek a colleague committed to learning, developing, and maintaining a dynamic curriculum that is responsive to the needs of Smith's diverse and talented student body. Applicants must have a Ph. D. in chemistry and a commitment to excellence in teaching; post-doctoral experience is not required but preferred.

We believe this is an outstanding opportunity for any Ph.D. graduate/ Post-doctoral associate who would want to get real academic experience at a top liberal-arts institution. Smith College is a member of the Five College Consortium with Amherst, Hampshire, and Mount Holyoke Colleges, and the University of Massachusetts. <http://www.smith.edu/deanoffaculty/facultypositions.html#CHM>

The Department of Biomedical and Pharmaceutical Sciences in the College of Pharmacy at The University of Rhode Island invites applications for a full-time tenure-track, Assistant Professor of Pharmaceutics position. This is a joint appointment with the Department of Chemical Engineering. Anticipated start date is July 2016. The successful candidate is expected to establish an extramurally funded research program in pharmaceutical formulation, drug delivery or dosage form design, contribute to teaching in the Doctor of Pharmacy, B.S. in Pharmaceutical Sciences, and graduate programs. In addition the candidate is expected to and participate serve on departmental, college, university and extramural committees.

Visit the URI jobs website at: <https://jobs.uri.edu> to apply and view the complete details of the job posting (#SF00220). Please attach 4 (PDF) documents to your online Faculty Profile Application: (#1) Cover letter, (#2) Curriculum Vitae which include the names and contact information of three professional referees, (#3) "Other Document" which combines the following as one complete document: a concise description of research accomplishments and future research plans, (#4) Statement of teaching experience and interests (as one complete document). APPLICATION DEADLINE: The search will remain open until the position is filled. First consideration will be given to applications received by March 15, 2016. Second consideration may be given to applications received by April 15, 2016. Applications received subsequent to the second consideration date (April 15, 2016) may not be given full consideration.

APPLICATIONS MUST BE SUBMITTED ONLINE ONLY. The University of Rhode Island is an

AA/EEOD employer. Women, persons of color, protected veterans, individuals with disabilities, and members of other protected groups are encouraged to apply.

The Department of Chemistry at Kalamazoo College invites applications for a full-time Visiting Assistant Professor position for one year—September 2016 through June 2017. The successful applicant will contribute to teaching in Organic Chemistry. A Ph.D. in chemistry or the equivalent is required (or evidence of imminent completion). Prior teaching experience is desirable. Candidates must demonstrate an interest in undergraduate teaching. The Departmental website can be viewed at: <http://www.kzoo.edu/chem>.

Kalamazoo College is a highly selective, nationally known liberal arts college of approximately 1450 motivated students, offering an integrated undergraduate experience that weaves a traditional liberal arts curriculum into domestic and international educational experiences (www.kzoo.edu). Approximately 10% of students major in Chemistry. Graduates of the Chemistry Department pursue studies in the health care field, graduate-level work in the discipline, or move directly into industrial positions. The campus is located midway between Chicago and Detroit, and the Kalamazoo area encompasses a community of 225,000, which supports several college and university campuses along with numerous civic arts and cultural associations. Thirty-five miles from Lake Michigan, the area offers many opportunities for outdoor activities.

Review of applications will begin immediately and will continue until the position is filled. A cover letter, curriculum vitae, statement of teaching philosophy, undergraduate and graduate transcripts (unofficial is acceptable), and three letters of recommendation addressed to Laura Lowe Furge, Chair, Department of Chemistry, Kalamazoo College, 1200 Academy Street, Kalamazoo, MI 49006-3295, should be submitted electronically in pdf format to the administrative assistant, Lauryn Kindle at Lauryn.Kindle@kzoo.edu.

Kalamazoo College encourages candidates who will contribute to the cultural diversity of the College to apply and to identify themselves if they wish. Equal Opportunity Employer

The National Research Council of the National Academies sponsors a number of awards for graduate, postdoctoral and senior researchers at [participating federal laboratories and affiliated institutions](#). These awards include generous stipends ranging from \$42,000 - \$80,000 per year for recent Ph.D. recipients, and higher for additional experience. [Graduate](#) entry level stipends begin at \$30,000. These awards provide the opportunity for recipients to do independent research in some of the best-equipped and staffed laboratories in the U.S. Research opportunities are open to U.S. citizens, permanent residents, and for some of the laboratories, foreign nationals.

Detailed program information, including online applications, instructions on [how to apply](#) and a [list of participating laboratories](#), is available on the NRC Research Associateship Programs [Website](#) (see link above).

Questions should be directed to the NRC at 202-334-2760 (phone) or rap@nas.edu. There are four annual review cycles.

Review Cycle: **February**; Opens December 1; Closes February 1

Review Cycle: **May**; Opens March 1; Closes May 1

Review Cycle: **August**; Opens June 1; Closes August 1

Review Cycle: **November**; Opens September 1; Closes November 1

Applicants should contact prospective Adviser(s) at the lab(s) prior to the application deadline to discuss their research interests and funding opportunities. More detailed information and an online application can be found at www.nationalacademies.org/rap.
