**2013 WEEKLY BULLETIN**  
**DEPARTMENT OF CHEMISTRY, NORTHWESTERN UNIVERSITY**  
**EVANSTON, ILLINOIS 60208-3113**  
**March 4, 2013**  
**CALENDAR FOR THE COMING WEEKS**

**Tuesday, March 5, 2013**      *Faculty Lunch Seminar*  
**Professor Peter Stair**  
Tech K140; 12 PM

**Wednesday, March 6, 2013**      *Faculty Meeting*  
K140; 12 PM

**Thursday, March 7, 2013**      *Graduate Recruiting*

*Organic Seminar*  
**Professor Timothy Jamison**  
MIT  
Ryan 4003; 10:30 AM  
Hosted by Professor Karl Scheidt

*“Continuous Flow Multi-Step  
Synthesis”*

**Friday, March 8, 2013**      *Graduate Recruiting*

**Saturday, March 9, 2013**      *Graduate Recruiting*

---

*Department Calendar can be found at <http://www.chemistry.northwestern.edu/events/calendar.html>*

**Reminder**

BIP meets every Friday in Tech K140 at 3 PM.

**Arrivals and Departures**

Alex Deynega has joined the Seideman group as a postdoctoral fellow.

Christine Koh has joined the Harel Group as a postdoctoral fellow.

Bogdan Negru has joined the Van Duyne as a postdoctoral fellow.

Britain Willingham has joined the Schatz group as a postdoctoral fellow.

Stephen Jensen has joined the Weiss group as a postdoctoral fellow.

## **Save the Date**

*L. Carroll King Memorial Lectures 2013*  
**Professor Brian P. Coppola, University of Michigan**  
Faculty Host: SonBinh Nguyen  
Dates: March 11 & 12, 2013  
March 11, 2013 - 4:00 pm. - Pancoe Auditorium  
&  
March 12, 2013 - 1:00 pm. - Tech L211

## **Upcoming Events**

*For other upcoming events, please visit <http://www.chemistry.northwestern.edu/events/calendar.html>.*

## **IMSERC needs a logo!**

If you think you have what it takes to design a great logo, submit your entries to us at:  
[a-ott@northwestern.edu](mailto:a-ott@northwestern.edu)

The designer of the winning logo will receive \$100 and credits on our site!

The logo contest is open to students and post-docs at Northwestern University. Submit entries as high-resolution image files, via e-mail. You can submit as many designs as you can dream up. Entries must be received by March 15th 2013.

## **Opportunities**

**UNIVERSITY OF YORK- Department of Chemistry and Centre for Hyperpolarisation in Magnetic Resonance** - Four postdoctoral positions available. The Department of Chemistry holds an Athena SWAN Gold Award and is committed to supporting equality and diversity for all staff and students. For further details see [www.jobs.ac.uk](http://www.jobs.ac.uk) or [https://jobs.york.ac.uk/wd/plsql/wd\\_portal.list?p\\_web\\_site\\_id=3885&p\\_function=map&p\\_class\\_type=Role%20type&p\\_class\\_value=Research&p\\_title=Research%20jobs](https://jobs.york.ac.uk/wd/plsql/wd_portal.list?p_web_site_id=3885&p_function=map&p_class_type=Role%20type&p_class_value=Research&p_title=Research%20jobs)

**Pacific Northwest National Lab** We are looking for a postdoc to join the molecular catalysis group in the Center for Molecular Electrocatalysis at Pacific Northwest National Lab, and we ask for your help in encouraging applicants. Our research involves synthetic and mechanistic organometallic/inorganic chemistry, and the current opening is for a project on design and development of electrocatalysts for oxidation of hydrogen or production of hydrogen.

Expertise in the synthesis and handling of air-sensitive compounds is needed, and experience in electrochemistry would be helpful but is not required. To apply, please go to <http://www.jobs.pnnl.gov/> and locate Job ID 302195.

**Southern Teachers Agency has quite a few chemistry and physical science job listings** from schools for the 2013-14 academic year. These jobs range from physical science at the middle-school level through high school AP Chemistry. It is common for science teachers to teach more than one kind of science, so some of these positions will require a chemistry teacher to lead sections of biology, physics, or another science. If you know of students who are interested in teaching science after they graduate, please consider forwarding this information to them. Certification is **not** required by private schools for many

science teaching jobs. [Click here to view current science teaching jobs](#) **Requirements:** For most of these chemistry teaching jobs, a bachelor's degree with a major in chemistry (or at the very least a chemistry minor) is essential, but teacher certification is not. Of course, a degree in science education is highly desirable, as is a master's degree in chemistry. Candidates should have a GPA of 3.0 or higher. Some of these positions require prior teaching experience.

**Application process:** Interested candidates should apply to Southern Teachers Agency by submitting a completed STA application ([available online](#)), along with a resume and cover letter to [teachers@southernteachers.com](mailto:teachers@southernteachers.com).

**The Portland Technology Development group's Thin Films division of Intel Corporation** has several openings for physical science Ph.D.s to support/direct R&D of advanced processing methods. Candidates hired for these positions will be responsible for developing the next generation of Intel's microprocessors. Ph.D. candidates in Materials Science, Chemistry, Chemical Engineering, Physics, Electrical Engineering or related fields are encouraged to apply. Criteria for selection include: a strong academic record, demonstrated experimental and data analysis expertise, superior critical thinking skills, an ability to drive and take responsibility for projects and a solid peer-reviewed publication record. Experience using and maintaining scientific equipment is preferred. Semiconductor processing experience is not mandatory. Openings are immediately available at Intel's primary development facility (Ronler Acres) located 10 miles west of Portland, OR. Please see a more detailed job description included below. Interested candidates should email resumes to [travis.j.hebden@intel.com](mailto:travis.j.hebden@intel.com) with "Intel Corporation Hiring" in the subject line.

**The Department of Materials Science and Engineering (MSE) at Stanford University** invites applications for a tenure-track position at the Assistant Professor level. Under special circumstances involving exceptional academic merit, candidates at the untenured Associate Professor level may be considered. We seek applicants with significant accomplishments in materials research in its broadest sense that may include materials characterization involving structure characterization, characterization through property measurement (e.g. nano-mechanics, nano-electronics), theoretical modeling, etc. Stanford University has excellent facilities in these areas as represented by the Stanford Nanocharacterization Laboratory (SNL), the Molecular Imaging Program at Stanford (MIPS), the Stanford Nano Center (SNC), the Stanford Nanofabrication Facility (SNF), the Center for Biomedical Imaging at Stanford (CBIS) and the X-ray facilities at the Stanford Linear Accelerator Center (SLAC). Applicants should include a summary of their educational and professional backgrounds, a current list of published work, and the names of at least three referees who may be consulted by the search committee. An indication of how the candidate's experience matches the position described above should also be given. Applicants are encouraged to write brief descriptions of their plans for future research and how those plans might be realized in a Stanford setting, as well as to submit similar statements on teaching, focusing especially on their vision of teaching to students in the Department of Materials Science and Engineering. The appointment is expected to be made during the forthcoming academic year. Please apply online at: [http://mse.stanford.edu/faculty/faculty\\_search.html](http://mse.stanford.edu/faculty/faculty_search.html). Applications should be submitted by March 31, 2013. Questions should be directed to, Search Committee Chair, c/o Carol Scott, via electronic mail to [msesearch@stanford.edu](mailto:msesearch@stanford.edu). EOE.

Professor Robert Sinclair
